

ALLIED PROFILES ^{LD}

REPAIR SERVICE

We offer a repair foil service. Almost everyone is aware that foiled products can be easily damaged, be it in transit, during manufacture or installation or due to break-ins or attempted break-ins.

Rather than put up with unsightly damage or having to go to the expense and inconvenience of replacing the product, we can now repair it for you. Once the product is foiled with Renolit foil, we are sure you will find the foil to match your existing finish.

Our staff have been trained by Renolit in Germany to carry out these works and are certified and approved to carry out same.
